Dear,

Thank you for agreeing to provide a technical review of our book “ **Mastering Azure Security** ”. This letter of understanding summarizes our agreement.

As a thank you, we will recognize your contribution by;

1. Crediting you as a reviewer in relevant published materials.
2. Sending you a complimentary print copy of the work.

We request that you help us promote the book by writing an honest review, and acknowledging your involvement in the project, on Amazon.com.

In exchange, we request that, for each chapter, you review the materials for accuracy, relevance, and clarity by inserting comments directly into the documents. There may be multiple iterations of certain chapters, based on your feedback.

While performing the review, we ask that you:

1. Adhere to the deadlines agreed upon with us
2. Insert detailed, self-explanatory comments (adopt an evidence-based approach)
3. Check for content accuracy, relevance, flow, gaps
4. Provide constructive, practical solutions, where possible
5. Test all instructions and code snippets to ensure they work as described and that the instructions are clear and direct. Provide screenshots of the final output, and if the codes don't work as expected, please explain the issue and, if possible, help to diagnose the problem and recommend a solution.
6. Check that the Q&A questions are accurate and can be answered using the information in the chapter.
7. Review and sign off all content shared for review within 4-5 working days, to ensure that the technical accuracy of the final product meets industry standards and best practices.
8. Write a comprehensive Summary Comment for each chapter.
9. The Reviewer shall keep all content of this work/manuscript strictly confidential and shall not disclose, disseminate, or use such information for any purpose, both during and after their process.

Please sign and date this letter to indicate that you've read and understood our terms and conditions.
